

DRAFT

A PROPOSAL OF A LOCAL ENHANCED MANAGEMENT AREA (“LEMA”) FOR  
WICHITA COUNTY TOWNSHIPS WITHIN THE BOUNDARIES OF WESTERN  
KANSAS GROUNDWATER MANAGEMENT DISTRICT NO. 1

To be submitted to the Chief Engineer, Kansas Department of Agriculture, Division of  
Water Resources contingent upon any proposed revisions and Board approval.

**I. Definitions**

- a. “Annual Authorized Quantity” – The maximum amount of annual water use assigned to a water right by *DWR* when the water right was approved or certified, and as modified by any subsequently approved changes, terms or conditions.
- b. “Appropriation Water Rights” – Pursuant to K.S.A. 82a -701(f), water rights that do not meet the conditions to be a Vested Water Right.
- c. “Board” – The *GMDI* Board of Directors.
- d. “Chief Engineer” – The Chief Engineer of the Division of Water Resources, Kansas Department of Agriculture.
- e. “Comparison Years” – The years, 2009 through 2015, used to determine *Historical Usage* of a point of diversion.
- f. “Conservation Factor” – Reduction percentage applied to *Historical Usage* for the calculation of *WHCL* Allocations: 25% for the Five-Year *WHCL* Plan.
- g. “Combined Well Unit” (CWU) – Multiple wells diverting water from the same source of supply and physically tied together for the distribution of water prior to the starting date of the *WHCL*.
- h. “Domestic Water Rights”- As defined by KSA82a-701c.
- i. “DWR” – Division of Water Resources, Kansas Department of Agriculture.
- j. “GMD1” – Western Kansas Groundwater Management District No. 1.
- k. “Historical Usage” – The average quantity of authorized water in acre-feet used by a point of diversion during the *Comparison Years*, excluding years of zero use from the seven-year average, used for the calculation of *WHCL* Allocations.
- l. “KAR”- Kansas Administrative Regulations.
- m. “KGS” – Kansas Geological Survey.
- n. “KSA”- Kansas Statutes Annotated.
- o. “LEMA” – Local Enhanced Management Area.

- p. “LEMA Period” – Five years, the five -year Plan shall run from 2021 through 2025.
- q. “Management Plan” – A written plan required pursuant to the order establishing this LEMA to promote conservation of water and water use efficiency.
- r. “MYFA”- Multi-Year Flex Account – A type of *Term Permit*.
- s. “Stakeholder” – Any water right owner within the *WHCL* boundaries.
- t. “Term Permit”- A DWR permit to appropriate water that is issued for a specified period of time and is automatically dismissed at the end of the period.
- u. “Vested Water Right” – Pursuant to K.S.A. 82a -701(d), a water right which has a priority date prior to June 28, 1945.
- v. “Voluntarily Enrolled Vested Right” – A Vested Water Right which voluntarily enrolls in the *WHCL* Management Plan.
- w. “Water Rights”- the rights granted to a water user by the State of Kansas through the DWR.
- x. “WUC” Water Use Correspondent.
- y. “WCA” - Water Conservation Area.
- z. “WHCL” – Wichita County Local Enhanced Management Area.
- aa. “WHCL Allocation” – The quantity of water in acre-feet allowed for each Appropriation Water Right and Voluntarily Enrolled Vested Water Right, assigned by point of diversion that may be diverted during the five year LEMA Period, as listed in Attachment A.
- bb. “WHCL Minimum Allocation” – A Percentage of Annual Authorized Quantity exempt from the Conservation Factor.
- cc. “WHCL Order of Designation”- The Order of Designation issued by the Chief Engineer pursuant to K.S.A. 82a-1041.

## II. Management Plan Goals

The first goal is to utilize a public process to develop a proposal that will extend Ogallala Aquifer supplies for the long-term benefit of the area included in the proposed WHCL. Specifically, the GMD1 Board is committed to working with Wichita County Stakeholders during Board meetings and other public meetings to develop the best possible plan based on the desires of the public.

The WHCL shall exist for a five-year period beginning January 1, 2021 and end December 31, 2025. In order to address excessive water level declines and withdrawal rates exceeding recharge rates within the proposed WHCL boundaries, the goal of the Management Plan is to limit irrigation withdrawals to 247,000 acre feet for the LEMA Period.

### III. Proposal

The WHCL shall include all Appropriation Water Rights for irrigation use whose source is the Ogallala aquifer within the WHCL boundaries. Pursuant to K.S.A. 82a - 703 Vested Water Rights within the WHCL boundaries shall not be regulated except through voluntary enrollment. When voluntarily enrolled in the WHCL, Vested Water Rights may not be withdrawn for the remainder of the LEMA Period.

WHCL Allocations for irrigation use will be established as follows:

- a. Each groundwater Appropriation Water Right and Voluntarily Enrolled Vested Right will be allocated 75% of Historical Usage multiplied by five to calculate the WHCL Allocation.

WHCL Minimum Allocation: 20% of Annual Authorized Quantity or held to Historical Usage if already below the 20% minimum.

- b. Appropriation Water Rights that share a well or point of diversion with Vested Water Rights shall be subject to the WHCL and will have a WHCL Allocation assigned as described in Section IV (a) (2).
- c. The WHCL shall include the following townships:

Wichita County

- Township 16S, Range 35W, Sections 1 through 36
- Township 16S, Range 36W, Sections 1 through 36
- Township 16S, Range 37W, Sections 1 through 36
- Township 16S, Range 38W, Sections 1 through 36
- Township 17S, Range 35W, Sections 1 through 36
- Township 17S, Range 36W, Sections 1 through 36
- Township 17S, Range 37W, Sections 1 through 36
- Township 17S, Range 38W, Sections 1 through 36
- Township 18S, Range 35W, Sections 1 through 36
- Township 18S, Range 36W, Sections 1 through 36
- Township 18S, Range 37W, Sections 1 through 36
- Township 18S, Range 38W, Sections 1 through 36
- Township 19S, Range 35W, Sections 1 through 36
- Township 19S, Range 36W, Sections 1 through 36
- Township 19S, Range 37W, Sections 1 through 36
- Township 19S, Range 38W, Sections 1 through 36

These sections represent a LEMA boundary that is both clearly identifiable and entirely within the boundaries of GMD1, fulfilling the requirements of K.S.A. 82a-1041(a) (1), (2).

- d. All WHCL Allocation quantities shall be expressed in terms of total acre-feet for the Five-Year LEMA Period and will be made available to each owner of a water right.
- e. Any unused WHCL Allocation, up to a maximum of five times the Annual Authorized Quantity, may be carried forward to a subsequent LEMA with an

effective Order of Designation in the year 2026 and the carryover quantity will not be subject to the new LEMA's conservation requirements.

- f. No point of diversion shall receive more than five times the Annual Authorized Quantity for the LEMA Period.
- g. WHCL Allocations are shown in Attachment A and are subject to review pursuant to the provision herein of IV (a) (6).
- h. WHCL Allocations for Water Rights subject to a DWR penalty order effecting permitted withdrawals from 2009 through the LEMA Period will be adjusted accordingly by DWR, and such order may not be appealed within the WHCL appeal process.
- i. Applications to change a Water Right filed with the DWR will be processed under existing laws, rules, and regulations; and shall be reviewed for consistency with the goals of the WHCL during the LEMA Period.
- j. Water Rights will not be permanently altered by a WHCL Order of Designation, but will be subject to the terms and conditions of the Order of Designation for the duration of the LEMA Period.
- k. Water Rights currently in their perfection period shall not be restricted by the Management Plan while in their perfection period.
- l. New Water Right applications will be considered by the Board on a case by case basis.

#### **IV. WHCL Allocations**

WHCL Allocations shall be assigned to the point of diversion and shall apply to all Appropriation Water Rights and Voluntarily Enrolled Vested Rights whose source is groundwater, subject to Section III. No Water Right shall be allowed to exceed its Annual Authorized Quantity unless authorized by a DWR Term Permit. WHCL Allocations for each Water Right will be included in an official Order of Designation issued by the Chief Engineer. Upon approval of the WHCL, WHCL Allocations are subject to review pursuant to the provision of IV (a) (5). These WHCL Allocations will be based on the following:

##### **a. Irrigation Water Rights**

- 1. The Historical Usage shall be reduced by the Conservation Factor. The result shall be multiplied by five (5) to establish the total WHCL Allocation for the Five-Year LEMA Period. e.g.

$$\text{Historical Usage} \times 75\% \times 5 = \text{WHCL Allocation}$$

WHCL Minimum Allocation for the LEMA Period shall be:  
(20% of Annual Authorized Quantity) or (Historical Usage if already

below the 20% minimum) X 5 = WHCL Allocation

2. If an Appropriation Water Right is authorized for the same point of diversion as a Vested Water Right that has not voluntarily enrolled in the WHCL, a WHCL Allocation shall be established for the portion, if any, of the Historical Usage authorized by the Appropriation Water Right, as follows:
  - A. If the Annual Authorized Quantity for the overlapped Vested Water Right is greater than the Historical Usage, then no WHCL Allocation will be established for that point of diversion and the Vested Water Right will be unaffected by the WHCL.
  - B. If the Historical Usage from the point of diversion is greater than the Annual Authorized Quantity of an overlapped Vested Water Right, the WHCL Allocation will be established by subtracting the Vested Water Right's Annual Authorized Quantity from the Historic Usage, multiplying the remaining quantity, which is authorized by the overlapping Appropriation Water Right, by 75% then multiplying that product by five as described in Section IV (a) (1).
3. Each point of diversion within the WHCL boundaries will be assigned a WHCL Allocation based on the calculation described in IV (a) (1).
4. If a point of diversion is authorized by more than one water right, it will be subject to any DWR limitations for the point of diversion.
5. Due consideration will be given for past conservation. If water rights are enrolled or have been enrolled in conservation programs, have implemented past conservation measures, and/or have no usage history or incomplete usage history during the Comparison Years, establishment of the WHCL Allocation will follow the guidelines set forth in Section XIII.
6. For Water Rights operating under the authority of a Term Permit, including a MYFA, or enrolled in a KAR 5-5-11 change, WCA, or other flexible water plan, the most water restrictive plan will apply. Water Rights withdrawn from a WCA will be subject to the WHCL.
7. Irrigation Use applications for MYFA Term Permits, must be filed in the first year of the LEMA Period.

b. Vested Water Rights (See Attachment B).

1. Pursuant to K.S.A. 82a-703, Vested Water Rights shall not be subjected to the Management Plan.
2. Vested Water Rights may voluntarily enroll in the WHCL to access the flexibilities of the Management Plan. If voluntarily enrolled, the Vested Right shall be subject to the terms and conditions of the Management

Plan including the assignment of a WHCL Allocation as described in IV (a) (1).

c. Non-Irrigation Uses - The water use reports of all non-irrigation use Water Rights will be reviewed annually by GMD1. Additionally each type of use is encouraged to implement the following recommendations:

d. Stockwater Rights

1. Become more efficient, by implementing scheduled infrastructure inspections and repairing leaks in a timely manner, upgrading old equipment, and applying water reuse technology.
2. Use less than the recommended maximum water authorized by K.A.R. 5-3-22.

e. Municipal Water Rights

1. Make it a goal to reduce their gallons per capita per day.
2. Implement scheduled infrastructure inspections and repair issues in a timely manner, in an effort to account for all water usage.
3. Be encouraged to:
  - A. Require all new and remodel construction projects use water efficient plumbing fixtures and recommend that all consumers meet the new standard by updating their existing fixtures.
  - B. Request all consumers, especially administrators of large capacity facilities and outdoor sport and recreation areas, maintain infrastructures and repair leaks in timely manner.
  - C. Request all consumers use less water intensive plants and lawn, water in the early morning and late evening, and be aware of the amount of water applied per year.

f. Industrial and Recreational Water Rights are asked to voluntarily conserve water whenever possible for the betterment of their water community.

g. Domestic Water Rights

Domestic Water Rights and all other domestic wells will not be limited by the Management Plan. However, for the betterment of their water community, owners of Domestic Water Rights and all other domestic wells are encouraged to:

1. Voluntarily make it a goal to reduce their gallons per capita per day.
2. Install water efficient plumbing fixtures in new and remodel construction and update their existing fixtures.
3. Identify and repair leaks.
4. Use less water intensive plants and lawn, and water in the early morning or late evening.

#### **V. Combined Well Unit (See Attachment C)**

Wells within a Combined Well Unit (CWU) will be allowed to share the combined quantity of their individual WHCL Allocations. No individual well shall be allowed to exceed its Annual Authorized Quantity unless authorized by a DWR Term Permit. Enrollment in a CWU must occur prior to the first irrigation application for the year the CWU will be implemented after the starting date of the WHCL, and will require all owners of the water right(s), to sign a notarized document provided by GMD1. This document will contain the water right numbers and locations of the wells that are physically tied together along with a map showing the location of the pipeline. Water right changes may be required to gain approval by the Chief Engineer. All Combined Well Units must be approved by the GMD1 Board of Directors and the Chief Engineer prior to implementation.

#### **VI. Violations**

The WHCL Order of Designation shall serve as initial notice to all Water Right owners within the WHCL boundary on its effective date. Violations shall be addressed as follows:

- a. Exceeding the five-year WHCL Allocation and all other Water Right violations shall be subject to applicable Kansas statutes and regulations, specifically but not limited to K.A.R. 5-14-10 and K.A.R. 5-14-12.
- b. The combined authorized pumping rate of all wells in a CWU shall be used to calculate the number of days pumping occurred in excess of the CWU's WHCL Allocation.

#### **VII. Metering and Monitoring**

- a. All Water Right owners shall be responsible for ensuring their water flowmeters are in compliance with state statutes and regulations prior to the diversion of water at each point of diversion.
- b. In addition to being in compliance with DWR requirements and reporting annually the quantity of water diverted from each point of diversion, all water right owners within the WHCL boundaries are encouraged to implement at least one other additional well/meter monitoring procedure.
- c. Should the flowmeter reported readings be in question and determined insufficient and no other records are provided upon request of GMD1, the well shall be assumed

to have pumped its full Annual Authorized Quantity for the year in question.

- d. Whenever a meter is repaired or replaced, the water right owner or authorized designee shall submit form DWR 1-560 Water Flowmeter Repair/Replacement Form to GMD1 or DWR within seven days of the completed repair.
- e. This metering protocol shall be a specific annual review issue and if discovered to be ineffective, specific adjustments shall be recommended to the Chief Engineer by GMD1.

## **VIII. Accounting**

- a. DWR, in cooperation with GMD 1, shall keep records of the annual diversion amounts for each Water Right within the WHCL boundary and the total five-year quantity balances. Upon written request, this information will be available to the Water Right Holder or GMD 1. GMD1 shall keep records of Combined Well Units.
- b. GMD1 and DWR shall cooperate on reconciliation and correction of any water use report found to be in error.
- c. GMD1 will provide DWR with copies of all completed Combined Well Unit Forms and any other documentation or information concerning the WHCL in a timely manner.

## **IX. LEMA Reviews**

- a. GMD1 Board in conjunction with DWR shall comprise the “Review Board” and shall conduct an annual review of items b (1-6). The review data shall be presented at the Annual Meeting of GMD1.
- b. Annual Review Items
  1. Water use data.
  2. Water table information.
  3. Economic data as is available.
  4. Compliance and enforcement issues.
  5. Any new and preferable enhanced management authorities that become available.
  6. Other items deemed pertinent to the Review Board.
- c. WHCL Order of Designation Reviews

In addition to the annual review of the WHCL the Review Board shall conduct a

more formal review of WHCL Order of Designation in the fourth year of the LEMA Period. The review will encompass the annual review items with a focus on the economic impacts, as data is available, to the WHCL area and the local public interest while pursuing the LEMA goals.

The Review Board shall produce a report to the Chief Engineer following this review that contains specific recommendations regarding future WHCL actions. This report shall be presented at Stakeholder meetings for the purpose of considering any future LEMA plans. All recommendations shall be supported by reports, data, testimonials, affidavits or other information of record.

## **X. Impairment Complaints**

It is the desire of the Stakeholders that any impairment complaint which is based upon either water supply issues or regional water-level declines be received by the Chief Engineer and either be deferred for investigation until the Management Plan is no longer in effect, or be investigated by the Chief Engineer in consideration of the on-going management activities.

## **XI. Water Level Monitoring**

Prior to this WHCL proposal there were 43 recognized observation wells, two with continuous water level sensors and one continuously monitored index well, all within or near the WHCL area that have been measured annually by either DWR or KGS personnel. For each of these wells, there is a long history of annual water level measurements. Pumping influences and recovery trends can be analyzed to evaluate results of the corrective controls implemented by this plan.

## **XII. Coordination**

The Stakeholders expect reasonable coordination between DWR and GMD1 on at least the following efforts:

- a. Development of the WHCL Order of Designation resulting from the LEMA process.
- b. Compliance and enforcement of the WHCL Order of Designation.
- c. Annual accounting of the WHCL Allocation quantities used and available balance to WHCL water right owners/operators.

## **XIII. Allocation Appeal Process**

- a. The following process will govern appeals for the possible modification of WHCL Allocations provided in Attachment A.
  1. No other WHCL issues may be appealed through this process.
  2. The GMD1 Board will serve as the appeals board. Information generated by DWR and KGS will be the Board's official source of information for appeals.

- b. Water Right owners must submit a written request for an appeal to GMD1 before March 1, 2022. Failure to file an appeal before March 1, 2022 will cause the WHCL Allocation to become final during the LEMA Period. The request shall specify the point(s) of diversion, relevant year(s) of the Comparison Years, and the basis for the appeal. During the appeal period, each point of diversion is limited to one appeal for each of the three reasons listed below. Water Right owners may withdraw their appeal by written notice prior to the Board issuing a final determination, refer to paragraph (e) below. New WHCL Allocations authorized by the Board will become effective the year the appeal is approved. Appeals may be based on any of the following reasons.
  1. Verification of reported water use history used for the WHCL Allocations provided in Attachment A.
  2. Due consideration of previous voluntary conservation measures resulting in an incomplete or diminished Historical Usage record.
  3. Water Rights on land not owned, leased, rented or otherwise previously controlled or pumped for any of the Comparison Years by the Farm Services Agency producer of record as of January 1, 2020 shall be allowed a flow rate test, refer to paragraph (g) below. Appeals for this reason shall be reviewed by the Board for approval.
- c. Appeals based solely on reported water use history will be referred to DWR for verification. Owner notification will be provided when the process is completed.
- d. Appeals based on previous voluntary conservation measures must be accompanied by supporting documentation before the appeal will be scheduled for consideration by the Board. Information that will be required includes:
  1. For water rights enrolled in government sponsored conservation programs, documentation must include an approved enrollment contract indicating the years of participation.
  2. Any other documentation supporting past voluntary conservation that may have influenced the water use record during the Comparison Years.
- e. The GMD1 Board will review the submitted information at the next scheduled board meeting or special meeting scheduled for the purpose of appeal reviews. The Board shall issue one of the following determinations.
  1. Denial of appeal.
  2. Grant an extension for the Water Right owner to provide additional information.
  3. New WHCL Allocation based on the information presented.
  4. Authorize a flow rate test. For points of diversion enrolled in government

sponsored conservation programs the test may be postponed until the current contract expires.

5. Authorize the WHCL Minimum Allocation.

f. Any judgement or final order issued by the Board may be appealed to the district court pursuant to K.S.A. 60-2101.

g. Flow Rate Test Procedure

1. All tests shall be conducted by GMD1 or DWR between June 1 and August 31.

2. All wells shall have adequate spacing to allow proper installation of test equipment. If spacing is insufficient the Water Right owner will have the opportunity to make the required adjustments to facilitate an accurate test.

3. Each well within a combined well unit shall be tested independently.

4. The resulting flow rate will be multiplied by 150 days to determine an annual acre-foot quantity, not to exceed the Annual Authorized Quantity. The annual quantity may be used to replace the year(s) of the Comparison Years under appeal. The new Historical Use record shall be reduced by the Conservation Factor to establish the new WHCL Allocation.

#### **XIV. Attachments**

Attachments A, B, & C will be available at the GMD1 office and on the GMD1 website ([www.gmd1.org](http://www.gmd1.org)).
